TEAM MEMBERS	JEYADESH J, DHANESH B, VARUN S, SENTHIL KUMARAN K

In this we have created and integrated the newly created chatbot, which helps the user to navigate through the application

Running the Flask

Adding Category

The screenshot displays a web browser window with the URL `127.0.0.1:5000/addCategory`. The application is titled "Expense Tracker" and shows a user profile "walter". The left sidebar contains three menu items: "Dashboard", "My Expenses", and "Limiting Expenses". The main content area is titled "Add Category" and includes the sub-header "Create a new category". The form contains three fields: "Category Name" with the value "FOOD", "Set Limit" with a slider set to 5000, and "Description" with the value "Food items.". A blue "Add category" button is located at the bottom of the form. A "Close" button is visible in the bottom right corner of the form area. At the bottom of the page, there is a copyright notice "© Personal Expense Tracker: IBM-Project" and a virtual assistant chat bubble that says "Hi! I'm a virtual assistant. How can I help you today?". The Windows taskbar at the bottom shows the Start button, Search, and several open applications, along with system icons for language (ENG IN), network, and battery, and a clock showing 00:56 on 19-11-2022.
